JOURNAL OF MOLECULAR LIQUIDS

Contents of Volume 48

The effect of orthogonal electric fields on the molecular dynamics of liquid water, principle three of group theoretical statistical mechanics
M.W. Evans (Ithaca, NY, USA) 1
Correlation between rotation and translation in chiral ensembles: comparison of molecule fixed and laboratory frame time correlation functions
M.W. Evans (Ithaca, NY, USA) 9
The host–guest interaction of macrocyclic ethers by ^{13}C dipole–dipole relaxation time measurements. Part VII. The complexing of dicyclohexano-18-crown-16 with K^+ and Na^+ acetates in methanol-d
C. Erk (Diyarbakir, Turkey) 17
Rotational and translational diffusion in liquid cycloheptane
M.L.H. Gruwel (Halifax, N.S., Canada) 31
Dielectric spectroscopy on binary mixtures of organic solvents
U. Kaatze and V. Lönnecke-Gabel (Göttingen, Germany) 45
Pump laser induced net angular momentum: angular polarisability, induced electric polarisation, and the inverse Faraday effect
M.W. Evans (Ithaca, NY, USA) 61
The spin polarisability of the electron
M.W. Evans (Ithaca, NY, USA) 77
Electro-optic Kerr effect studies in liquids and binary liquid mixtures
J. Philip and T.A. Prasada Rao (Madras, India) 85
Preface ii
Inertial theories of dielectric relaxation in liquids
J. McConnell (Dublin, Ireland) 99
Odd–even alternation of freedom of alkyl chain molecular motions in nematic and isotropic liquids as observed by the neutron incoherent scattering
J.A. Janik, J.M. Janik, T. Stanek (Kraków, Poland) and K. Otnes (Kjeller, Norway) 111
Molecular dynamics of liquid water probed by neutron scattering
J. Teixeira, M.-C. Bellissent-Funel (Saclay, France) and S.-H. Chen (Cambridge, USA) 123
The distribution of polar molecules and ions near a solid surface. The asymptotic behaviour of the profile as a test of the HNC approximation
Q. Zhang, J.P. Badiali and M.L. Rosinberg (Paris, France) 129
Complex permittivity measurements of highly absorbing liquids in the frequency range 70–600 GHz
T. Grochulski (Warsaw, Poland) and A. Gerschel (Orsay, France) 141
Asymptotic analysis of semi-classical resonance wave functions
R. Lefebvre (Orsay, France) 155
The spectrum of proton vibration in weak complexes with a hydrogen bonding in solutions
A.A. Zharikov and A.I. Burshtein (Novosibirsk, USSR) 165
Molecular relaxation processes in liquid mixtures containing iodine complexes
M. Besnard, N. Del Campo (Bordeaux, France) and J. Yarwood (Durham, U.K.) 183
Molecular solvent vibrational effects on the friction for barrier crossing reactions
A.G. Zawadzki (Holmdel, USA) and J.T. Hynes (Boulder, USA) 197
Isotopic dilution effects on the isotropic Raman spectra of methane in supercritical fluid
F. Marsault-Herail and M.A. Echargui (Paris, France) 211

Character of the hydrogen bond in the thiophenol–triethylamine complex
M. Ilczyszyn and H. Ratajczak (Wrocław, Poland) 227
High pressure ^{29}Si NMR study of the sol-gel process
D.W. Hua, Y. Masuda and J. Jonas (Urbana, USA) 233
What mechanisms for transfers of protons through H-bonds?
Y. Maréchal (Grenoble, France) 253
Thermal lens spectroscopy of the phenothiazine dye thionine in solution
U. Hempelmann and Th. Dorfmüller (Bielefeld, FRG) 261
Uncorrelated jumps model for orientational relaxation in ordered fluids
N. Kirov, I. Dozov (Sofia, Bulgaria) and S. Temkin (Novosibirsk, USSR) 277
Liquid water structure at the wall. RISM approach
B. Borštnik and D. Janežič (Ljubljana, Yugoslavia) 293
Useful friction and Langevin equations
G. Tarjus (Paris, France) and D. Kivelson (Los Angeles, USA) 303
Computer simulation of the depolarized Rayleigh scattering in fluid N_2
W.A. Steele (University Park, USA) 321
Concentration and solvent effects on the hydrogen bonded complex of quinoline with trifluoroacetic acid
Z. Dega-Szafran, E. Dulewicz and M. Szafran (Poznań, Poland) 347

Contents of Volume 48 347
